Marijuana, especially today's highly concentrated products and delivery systems like vapes, is causing severe mental and physical illness and even death. Many mistakenly think marijuana is less harmful than other drugs and alcohol. Still, marijuana is a mind and mood-altering drug that is addictive and can cause Cannabis Use Disorder, Cannabis-Induced Psychosis, and Cannabinoid Hyperemesis Syndrome.

Due to misperceptions about the harms of marijuana, users and families suffer longer before reaching out for **help**.

Every Brain Matters is a community created to help families and bring **hope**.
